Contribution on Drupal .org

1. Logout Redirect Module :

https://www.drupal.org/project/logout_redirect/issues/3107832

https://www.drupal.org/project/logout_redirect/issues/3160454

2. Drupal Core:

<https://www.drupal.org/project/drupal/issues/3156555>

3. Notification Widget:

<https://www.drupal.org/project/notificationswidget/issues/3152470>

PROJECT DETAILS:

1. Performance Management System:

Portal to manage performance based on annual goals of employees throughout the organization. Has certain conditions based on Goals setup, mid-year review and final appraisal cycle.

2. Hospital Management:

A web-based application that can be used to view the overall hospital features, doctors details and all the hospital information ,also can be used for booking the appointment for a particular doctor which includes the workflow features. And also added OTP based login. The user can also calculate their online BMI and BMR.

3. Aatmanirbhar Bharat:

A Web-based Application which is used ,to tackle the challenges being posed by the COVID 19, Hon'ble Prime Minister of India announced a special economic and comprehensive package of Rs. 20 lakh crore - equivalent to 10% of India's GDP on 12th May 2020. He gave a clarion call for 'AatmaNirbhar Bharat Abhiyan' or Self-Reliant India Movement wherein he outlined the five pillars of AatmaNirbhar Bharat viz. Economy, Infrastructure, System, Vibrant Demography and Demand. For timely implementation and real-time monitoring of the package components, there is a felt need of a tracker mobile or web app to facilitate the government departments and senior officials of the state.

RELEVANT TRAININGS:

Training 1: Core Java

Title : Training on Core Java, DBMS Concepts from Profound Edutech Pvt. Ltd.

Period : 6 months

Description : Java technologies training program was designed to provide training about Java, J2EE & DBMS

Technologies. The training program covered the following topics:

- Core Java.
- J2EE Technology (JSP, Servlets, JDBC)
- Scripting Language (JavaScript, CSS, HTML, AJAX)
- Oracle Concepts, SQL & PL/SQL Programming

IN HOUSE PROJECT:

Title: Disaster alert using Geo-Fencing.

DESCRIPTION: In this project, whenever a natural calamity arises a Geo-Fence will be created to that particular location. If the user is near or at that location, he/she would get an alert message about that calamity prone zone. This creates an awareness about the danger allotted at that area and would also to avoid traffics and crowding of people at or near the zone. This will provide a major help to the society and the concerned authorities.

- Technology: HTML, CSS, JavaScript, PHP, MySQL
- Responsibility: Coding, Testing, documentation, designing, database connectivity.

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the mentioned particulars.
